

Tarpaulin covered lorries

Reliable and modern is the fleet of our contractual companies which is exclusively made up of qualified professional lorry drivers.

All vehicles are equipped with mobile communications. This guarantees a trouble-free and safe transportation for your freight.

We primarily use tarpaulin covered lorries and megaliner (articulated trucks and trailers) with a loading height of 3 m:

13.6 metre tautliners

Inside height: 2.6 m to 2.7 m

Loading volumen: approx. 85 m³

Pallet space: 34

Useful load: 25 t

13.6 metre megaliner

Inside height: 3 m

Loading volume: approx. 100 m³

Pallet space: 34

Useful load: 25 t

Logistics, scheduling

... competent with the most modern technology

DEUFRANCE advises, plans and implements logistic projects of every size in close consultation with the customer. From simple transportation to comprehensive »just in time«-solutions with overall responsibility.

- **Professional scheduling**

All the employees on our friendly team are multi-lingual (German, French, Polish, English) and have long years of experience in lorry scheduling. In this way, every enquiry can be answered quickly without delay and a problem is solved immediately.

- **The most modern communication**

Over 90 contractual lorries are centrally loaded by our Scheduling Department using the most modern communication technology. We have some of the most efficient EDP equipment which guarantees high data and failsafe security through permanent maintenance and daily data back-ups. Our Scheduling Department is connected directly to the largest freight market in Europe over the Internet. All scheduling agents can be directly contacted over the phone and e-mail. Our contractual companies are all equipped with mobile communications.
